Wall-mounted scales 2821

Calibratable wall-mounted scales for goods acceptance checks, recipes and sales

The major benefits of SOEHNLE wall-mounted scales are the low space requirements and high protection against moisture and detergents.

Design

The solid, compact design and overload protection for the load cell also guarantee a long service life. The housing and weighing pan are made of 1.4301 stainless steel and the support is galvanised. The fully-electronic design

means that the scales have no moving wear parts making it almost maintenance-free. The compact dimensions and the foldable weighing pan allow the scales to be used even when space is at a premium. The wall fixing also brings additional cleaning benefits because the floor beneath is kept completely free. An encapsulated load cell is available as an option for weighing in extremely damp/wet areas.

Technical data

- Weighing range either 60kg or 150kg
- Large weighing platform 550x440mm
- suitable for certification class III
- Display units: three display variants available

Display unit 2780 Niro

Stainless steel housing of IP65. Gaspermeable membrane against condensation, integrated power supply. 1 set of scales can be connected, backlit 30mm display, membrane keypad with acoustic acknowledgement. All basic functions available: reset, taring, optional data interface for printer/computer.

Display unit 2760 Niro

Stainless steel housing of IP65, external power supply with IP30, optionally IP65. 3 sets of scales can be connected, backlit 16mm display, membrane keypad with acoustic acknowledgement. Basic functions plus totaliser and commissioner, data interface.

Display unit 2761 Niro

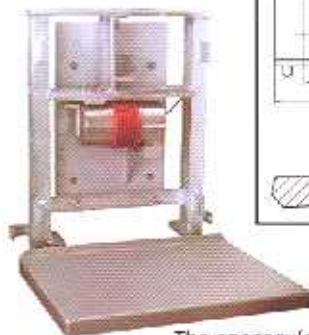

As 2760 but with numeric keypad for manual tare input, tare memory, date/time memory, input of organisational data, additional alphanumeric display.

Order number	Design	Weighing range (kg)	Divisions (g)	Dimensions
2821.22.001	Standard	60	20	
2821.23.001	Standard	150	50	
2821.32.001	Encapsulated load cell	60	20	
2821.33.001	Encapsulated load cell	150	50	

Accessories

Order number	Description
2509.01.001	Meat hook for installation, stainless steel SS304, hook made of aluminium alloy
5908.01.001	Power supply with IP65 for 2760/2761
2503.02.001	Niro wall-mounting bracket for display unit 2780

The encapsulated load cell, IP67 degree of protection, optimum protection against moisture and detergents.
